## MY SELF

I'm a Full Stack MERN Developer skilled in React.js and TypeScript, focused on creating smooth and dynamic user interfaces. I also work with the Next Js to build full-stack applications. I'm comfortable using Git and GitHub, which helps me manage code and collaborate effectively.

## PREVIOUS WORK

### APEX AI

22 DEC 2025

[apexai-pk.netlify.app](https://apexai-pk.netlify.app)

- Designed and developed a secure backend architecture using Node.js, Express, and MongoDB. Implemented JWT-based authentication and authorization to ensure scalable and secure API access.
- Work as Back End Developer

### Get URI

22 DEC 2025

[geturi.online](https://geturi.online)

- A developer-focused media hosting platform built for speed and simplicity. Abstracts file handling and delivery so teams can focus on building products instead of managing infrastructure
- Work as Full Stack Developer

### Gulzar Sons Furniture

22 DEC 2025

[gulzarsonsfurniture.com](https://gulzarsonsfurniture.com)

- A production-ready business website built with Vanilla JavaScript and a custom Node.js backend using MongoDB for product and order management
- Work as Back End Developer

### PersonaAEye AI

22 DEC 2025

[personaaeye.netlify.app/](https://personaaeye.netlify.app/)

- AI-powered frontend experience built with React, Zustand, and Tailwind CSS. Focused on performance, responsiveness, and clean state management.
- Work as Front End Developer

### Pinterest Clone

22 DEC 2025

[pinsyourinterest.onrender.com](https://pinsyourinterest.onrender.com)

- A full-stack Pinterest-inspired platform developed with Node.js, Express, MongoDB, and EJS. Includes user authentication, pin management, and responsive UI.
- Work as Back End Developer
